Dependent Eligibility Verification

cleartrackhr

We're excited to share the latest Clearify Update, highlighting new features, enhancements, and ways to strengthen your plan's integrity. As healthcare costs continue to rise, Clearify helps you stay ahead with tools designed to reduce risk, control spend, and keep your benefits data clean.

New Enhancements

Role-Based Access Control (RBAC)

Role-based access by location and department, so users only see what's relevant to them—improving security and efficiency.

Smoother Employee Login

Users who already have their registration code can quickly activate their account with a streamlined "Find Account" option. For those who can't locate their code, Clearify now offers a simple guided path to securely retrieve it—eliminating confusion and reducing support needs.

Ability to perform WSV Only Audits

This enhancement allows you to validate spousal eligibility independently—without conducting a full dependent audit—making it ideal for organizations looking to enforce plan rules, apply surcharges, or confirm access to other coverage with minimal disruption.

4-10%

of dependents are Ineligible and cost Employers \$5,000-\$8,000 (or more) per year

Coming Soon

Automated Working Spouse Verification (WSV)

Eliminate paper and simplify Working Spouse Verification with a workflow directly to the dependents employer.
